Anand Chamoli

Analytics Engineer & Data Analytics Professional | BS Data Science (Business Analytics) @ ASU | SQL, Data Warehousing, Dimensional Modeling, Python | Automotive & Agriculture Domain
Atlanta, Georgia, United States

Summary

I apply SQL, Python, Power BI, and Tableau to analyze data, build dashboards, and support business decision-making, bringing a strong business-first perspective shaped by 14 years of professional experience in the Automotive and Agriculture industries.

My prior experience across After-Sales operations, Sales, and Marketing has given me deep exposure to customer behavior, operational KPIs, revenue drivers, and performance measurement within large, process-driven organizations. This background allows me to understand not just the data, but the business context behind the numbers.

I am currently transitioning into Data Analytics and Analytics Engineering through a Bachelor of Science in Data Science (Business Analytics track) at Arizona State University, with expected completion in July 2026. Through my coursework, I have developed strong skills in SQL, relational databases, applied statistics, Python-based analysis, Power BI, Tableau, and data warehousing with dimensional modeling (star and snowflake schemas).

Through hands-on projects, I have worked on data cleaning, exploratory data analysis, statistical inference, analytical data modeling, and KPI dashboards and performance reporting, translating raw datasets into clear, decision-ready insights for business stakeholders.

I am actively building toward opportunities in Data Analytics, BI/ Analytics Engineering, or Junior Data Engineering (data-warehouse-focused) roles, where I can combine domain expertise with strong SQL, data modeling, visualization, and analytical skills to support data-driven decision-making and business performance.

Core Skills: SQL, Data Warehousing, Dimensional Modeling, Python, Data Analysis, Business Analytics, Statistics, Power BI, Tableau
Domains: Automotive, Agriculture, Sales, Marketing, After-Sales Operations

Experience

Arizona State University

Data Analytics & Analytics Engineering Trainee (Academic Projects)

2024 - Present (2 years)

United States

Applied data analytics and data science concepts through hands-on academic and project-based work.

Designed analytical data models using fact and dimension tables for BI and reporting use cases.

Used SQL extensively to query, clean, and analyze relational datasets.

Performed data cleaning, EDA, and statistical analysis using Python.

Built analytics-ready datasets to support dashboards, reporting, and business intelligence workflows.

Escorts Kubota Limited

11 years 8 months

Zonal Sales Manager

June 2021 - March 2022 (10 months)

Faridabad, Haryana, India

Drove zonal sales performance by analyzing dealer KPIs, market trends, and customer insights.

Improved channel efficiency through data-backed performance reviews and targeted interventions.

Led new-business development initiatives to drive regional revenue growth.

Escorts Transformation Office (ETRO)- War Room

February 2020 - June 2021 (1 year 5 months)

Faridabad, Haryana, India

Worked with top leadership on data-driven strategic initiatives to support business growth and future opportunities.

Conducted market and operational analysis for Bihar/Jharkhand to guide regional sales and marketing strategy.

Lead Field Support & Service Marketing
October 2018 - February 2020 (1 year 5 months)
Faridabad, Haryana, India

Managed after-sales revenue streams using KPI tracking, dashboards, and performance analytics.

Strengthened customer retention through data-driven service initiatives and process improvements.

Oversaw IoT-enabled CARE 24×7 operations to enhance service quality and customer experience.

Lead - Service Marketing
December 2015 - October 2018 (2 years 11 months)
Faridabad Area, India

Analyzed service KPIs to identify performance gaps and drive targeted improvement programs.

Managed spares & lubricant business performance using MIS reporting and trend analysis.

Led IT-enabled service projects, dealer audits, and dashboard development to support decision-making.

Area Service Manager
August 2010 - December 2015 (5 years 5 months)
Varanasi, Uttar Pradesh, India

Improved customer satisfaction by analyzing complaint patterns and driving corrective actions.

Managed service operations, training, and spare-parts planning using data-based insights.

Led service campaigns and performance reviews to strengthen dealer network efficiency.

Mahindra & Mahindra

Customer Care Manager International Operations

July 2008 - July 2010 (2 years 1 month)

Mumbai, Maharashtra, India

Managed overseas customer service operations, analyzing performance data and resolving product issues.

Improved spare-parts turnaround and customer satisfaction through dispatch metrics and cross-team coordination.

Delivered technical training and communicated product updates through structured documentation.

Education

Arizona State University

Bachelor of Science - BS, Data Science · (January 2023 - July 2026)

Rustamji Institute of Technology (RJIT) - BSF

Diploma in Automobile Engineering (3 Years), Automobile/Automotive Mechanics Technology · (2005 - 2008)

Indian Institute of Management, Lucknow

Executive Certification Course (One Year), Business Management · (January 2014 - January 2015)
